

REMARKS

Claim Amendments

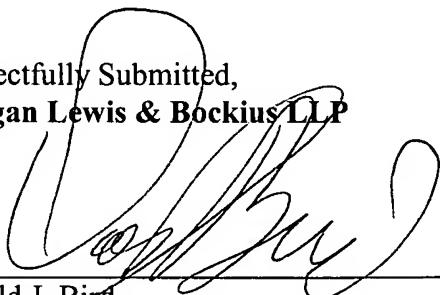

The above amendments are being made to place the claims in a format in accordance with U.S. practice and to eliminate improper multiple dependencies. Claims 1-6 and 8 are substantively identical to the original claims and have only been reformatted to use hanging indents to better delineate the different moiety definitions. The following claims have been amended:

- Claim 9 has been amended to be dependent only on claim 1 (to avoid improper multiple dependency of later claims), and a colon [;] has been added to the end of several compound names as shown by the vertical line in the left margin and the underlining of the colon; and claim 9 has also been reformatted to use hanging indents to better delineate the different compounds.
- Process for making claim 10 has been amended to be dependent only on claim 1, and reformatted for improved readability.
- Pharmaceutical composition claim 11 has been amended to remove the inappropriate use limitation, and has been made dependent only on claims 1, 2 and 9.
- Claims 12-15 have been cancelled as being in a “use” format not generally accepted under US practice.
- New method of treatment claim 16 has been added, directed to the treatment of specific diseases. Support for new claim 16 is found, *inter alia*, in cancelled claim 15 and in the specification at page 32, lines 20-24.

No new matter has been added. Therefore, entry of these amendments is believed to be in order and is respectfully requested. Following entry of these amendments, claims 1-11 and 16 remain pending in this application.

No additional fees are believed due other than those charged with this response to missing parts filing. However, any and all charges or credits should be submitted to the Morgan Lewis & Bockius LLP Deposit Account No. 50-0310.

Respectfully Submitted,
Morgan Lewis & Bockius LLP
